

YOU CAN RELY ON THESE – useful new tool trends!

SUPER 4 PRO WIRE STRIPPER

The SUPER 4 PRO is an ergonomic, automatic wire stripper for both solid and flexible conductors with PVC insulation from 0.2 to 6.0 mm², with diagonal pliers for conductors up to 2.5 mm². The wire stripper with its special sensor system automatically adjusts to the cross-section of the cable which then prevents the inner conductors and stranded wires being damaged.

*With practical diagonal pliers for
conductors up to 2.5 mm².*

- **New technology:** With a sophisticated new cable guide element, the wire stripping process is made easier, which means that in contrast to previous models, the SUPER 4 PRO can strip the wires off a wider range of cable sizes with various PVC cable mixtures. To complete repetitive work easily and without errors, the stripping length can be fixed from 6 to 15 mm using the adjustable length stop.
- **Robust:** The SUPER 4 PRO is a particularly robust tool which continuously delivers excellent wire stripping results, even in difficult environments. Any dirt can easily be removed using compressed air. The blades can easily be replaced.
- **Ergonomic:** The newly designed, ergonomic 2-component pliers handles allow optimal power transfer to the pliers, while the narrow jaw of the pliers makes it possible to work in places that are difficult to access.

CIMCO HEAVY-DUTY RUBBISH SACK

The extremely strong and resilient CIMCO heavy-duty rubbish sacks with a 40 litre capacity are ideal for transporting materials, such as building rubble, or disposing of all kinds of waste. Bulky and sharp-edged materials are securely and reliably packaged.

- Material: polyethylene
- Dimensions: 500 x 800 mm
- Volume: 40 l
- Thickness: 0.15 mm/150 µm
- Colour: transparent-opaque
- PU: 10 pcs

CIMCO-item no. 14 5000

RATCHET SCREWDRIVER SET, 18-PIECE

The ratchet screwdriver set incl. transport roll-up case is an innovative product for tightening and undoing screws. You can choose whether the screwdriver rotates to the left/right, the working angle of the holder has 3 positions (0°, 45° or 90°). The combined tool attachment allows normal hexagonal bits to be attached as well as nut drivers with a square holder by simply sliding the lining. The 2-component handle allows you to work without slipping and without tiring. The 12 bits included are securely stored in the handle to save space. 5 nut drivers and the screwdriver are all safely stored in the transport roll-up case.

Scope of delivery:

- one bit each for:
Slot-head screws 2.5 x 0.4 mm, 4.0 x 0.8 mm
Phillips crosshead screws PH 1, PH 2
Pozidriv crosshead screws PZ 1, PZ 2
Special screws with combination profile PZ/FL 1, PZ/FL 2
Hex head screws 4 mm, 5 mm
TORX® screws T15, T20
- Sockets: size 7, size 8, size 10, size 11, size 13
- Transport roll-up case

CIMCO-item no. 11 4866

The 12 bits included are securely stored in the handle.

VOLTAGE TESTER WITH FI-/RCD TRIGGER

The universally useable voltage tester with phase rotation testing, continuity test, one-pin phase testing and trigger testing for FI/RCD protective devices is built to comply with the latest safety regulations and makes sure you can work safely and reliably.

- Built according to IEC 61243-3:2014
- Measurement category (CAT.) IV 600 V
- DC and AC voltage testing up to 690 V
- Polarity display and one-pin phase testing
- Two-pin phase rotation determination to earth
- Trigger test for residual current protective devices
- Illumination of test points using white LED
- Switches on and off automatically
- Continuity test
- IP64 (IEC60529)

CIMCO-item no. 11 1438

With load connection for FI testing.

FLEXI-CRIMP 6

The new crimping pliers for wire end ferrules

THE NEXT DIMENSION OF CRIMPING TOOLS

With the new FLEXI-CRIMP 6 crimping pliers for wire end ferrules, CIMCO is opening the door to a new dimension of crimping tools. The hexagonal crimping which has now become established in wire end ferrule technology creates optimal crimping shapes that allow the user to work in small spaces without any extra effort. For the first time, the new FLEXI-CRIMP 6 now processes the cross section range from 0.08 to 16 mm² (for individual wires), as well as 2 x 0.5 to 2 x 10 mm² (for twin wire end ferrules) with just one tool. The cross-section range is set before crimping and being able to feed the wire end ferrules in from the side makes the work easier.

- Cross section range from 0.08 to 2 x 10 mm²
(for crimping wire end ferrules according to DIN 46228 part 1 + 4)
- Feed in ferrules from the side
- Hexagonal crimping for tight connection dimensions
- Self-adjusting adaptation to the required wire end ferrule size
- Consistently high crimp quality thanks to ratchet lock
(can be unlocked)
- Weight: 380 g

CIMCO-item no. 10 1950

**flexi
crimp® 6**

Cross section range:
0.08 to 2 x 10 mm²

TRIED AND TRUSTED QUALITY

with new rack system

GIGANT TROLLEY TOOL CASE PRO

The Gigant case system is setting new benchmarks! The Gigant tool case has already proven its worth in many parts of the electronics industry. It protects its contents from water and dust, is airtight, acid-resistant, pressure-resistant, shock-proof, and virtually indestructible. An even more deluxe version is coming onto the market with the new Gigant PRO. With the same dimensions and features, the Gigant PRO will impress you with the new rack system of tool boards. This allows you to store tools cleanly and securely in the case, saving space and ensuring they are permanently held securely, even if the case accidentally falls over.

- Robust tool case for punishing everyday use
- According to IP67, protected from dust and water, airtight, shock-proof, acid and pressure resistant
- Acid-resistant bolts in the hinge area, a rubber seal in the case shell protect the content of the case from external influences
- Two clamp locks on the sides as well as two on the front with the new 2-stage mechanism to make them easier to open
- Three extremely wide and strong handles make it comfortable to carry, the trolley handle can be locked in the top and bottom position to make it easier to roll along
- Equipped with two tool boards in both the case lid and the bottom shell of the case; the lower tool board in the bottom shell is raised on partitions, the second tool board is secured with 50 mm spacing from the bottom one, laying on four metal brackets
- Dimensions: 630 x 490 x 300 mm
- Weight empty: 14.5 kg

CIMCO-item no. 17 0094

To compensate for positive pressure, the case is equipped with a hand valve.

Two stable rollers ensure secure transport.

GIGANT COMPACT TROLLEY TOOL CASE

Eight places around the handles where the case can be locked with shackle locks.

The compact version of the Gigant series. As a small, handy trolley, the case is fitted with three tool boards, two with the convenient rack system and one with the pockets system. The Gigant COMPACT trolley tool case is fitted with all the advantages of the Gigant series (see details CIMCO-item no. 17 0094). Its special features are its weight and its size.

- Dimensions: 600 x 370 x 250 mm
- Weight empty: 7.5 kg

CIMCO-item no. 17 0098

The new rack system provides individual order.

The case lid is held in position by two gas struts.

THE SPECIALIST

for really specific requirements

GIGANT E-MOBILITY TROLLEY TOOL CASE

By the year 2030, the Federal government in Germany would like around 10 million electric cars to be registered, which inevitably means that the number of breakdowns in this area will also increase over the coming years. To fix these, you need specific equipment which is suitable for working on live parts. The 40-part Gigant E-MOBILITY tool case trolley provides you with a solid basis of VDE tools which are especially designed for repairing electric cars, personal protective equipment, and accessories. It guarantees safe storage of your high quality tools, protected from water and dust. This means that nothing stands in the way of safe repair by an expert.

- Dimensions: 630 x 490 x 300 mm
- Weight: 23.1 kg
