

KATI® BLITZ COMPACT

The cable pull system for professionals. Now in black!

Available from October 2018

A new design in our tried and trusted quality!

An attractive looking tool with impressive functionality: The Kati® Blitz makes it possible to pull cables through cable ducts even under the most difficult conditions. It passes through long stretches with tight bends with ease, even in pipe systems where cables have already been laid. Its attractive design is an added bonus. The Kati® Blitz compact helps where other pulling aids wouldn't have chance!

Kati® Blitz compact Cable pulling with ease

- With the tried and trusted Polykat® fibreglass rod in impact resistant housing (20 m, 30 m, or 50 m)
- Internal, rotating storage drum
- With integrated accessory set
- With a special Kati® Grip gripping aid
- Each with a guide head 7–10 mm ø
- 3 Rod ends and 2 rod ends 2.0 on the rod
- 3 Connecting sleeves
- 5 Cable lugs
- 1 Cable draw grip 6–9 mm ø
- 1 Fibreglass fix adhesive (3 g bottle)

CIMCO-item no. 14 2020 20 m
CIMCO-item no. 14 2024 30 m
CIMCO-item no. 14 2028 50 m

Kati® Blitz Compact accessories

Kati® Blitz EASY GRIP

- Allows 3 mm fibreglass rods to be inserted and pulled out of empty conduits, saving energy and preventing fatigue
- Max. thrust power: 20 kg

CIMCO-item no. 14 2180

Flexible guide head 2.0

- Optimal force application of bending forces
- Is not subject to material fatigue as with, for example, a spring guide head
- The optimal tool for passing through very tight bends when combined with the 2.0 rod end
- Bending radii up to 30 mm are possible

CIMCO-item no. 14 1072 7 mm ø
CIMCO-item no. 14 1073 10 mm ø
CIMCO-item no. 14 1074 13 mm ø
CIMCO-item no. 14 1078 Set of 7, 10, 13 mm ø

Cable lug

- Made of brass
- With internal thread M 5
- Suitable for all lengths, also including all Kabelmax® devices

CIMCO-item no. 14 2144

Cable draw grip

- With swivel
- With internal thread M 5
- For cable 6–9 mm ø

CIMCO-item no. 14 2152

Kati® Blitz replacement bar

- For Kati® Blitz compact and Kati® Blitz 2.0, with 2 rod ends 2.0

CIMCO-item no. 14 2120 20 m
CIMCO-item no. 14 2122 30 m
CIMCO-item no. 14 2124 50 m

Rod ends 2.0

- Made of brass, with plastic sleeve
- With external thread M 5
- Suitable for all lengths

CIMCO-item no. 14 1070

Spring guide head

- Made of brass
- With internal thread M 5
- Suitable for all lengths, also including all Kabelmax® devices

CIMCO-item no. 14 2130 7 mm ø
CIMCO-item no. 14 2132 10 mm ø
CIMCO-item no. 14 2134 13 mm ø
CIMCO-item no. 14 2140 Set of 7, 10, 13 mm ø

Kati® Blitz service set 2.0

- 12 piece set of accessories and spare parts for all Kati® Blitz products, made up of

3 rod ends 2.0 14 1070
5 cable lugs 14 2144
3 connecting lugs 14 2146
1 fibreglass special adhesive 14 2192

CIMCO-item no. 14 1080

Connecting sleeve

- Made of brass, suitable for all lengths

CIMCO-item no. 14 2146

Kati® Blitz Mini

Kati® Blitz Mini has been especially developed to meet the growing demands for retrospective fibre optic cable installations in existing, already occupied empty conduits. Laying fibre optic cables is made easier or even made possible by using the Kati® Blitz Mini. Apart from the small diameter, the specially developed Polykat® Mini fibreglass profile features high rod strength and thrust stability, as well as a very small bending radius of 15 mm. Combined with the flexible guide head Mini and a low-friction guide hose, the insertion process is quick and easy.

Product advantages at a glance:

- Flexible guide head Mini: Special contour for getting through narrow spaces and around tight bends
- Rotating rod cassette: The rod is pushed into the empty conduit by rotating the cassette
- Axle bearing cassette: High reset force of the Polykat® Mini supports automatic unwinding of the rod
- Guide tube: Protects and guides the profile when inserting, considerably reduces the risk of rod breakage when retracting
- Grip plate with rod stop: Prevents the rod unwinding when not in use

Accessories supplied:

- 5 Flexible guide heads M 2.5 with internal thread
- 7 Rod ends M 2.5 with external thread
- 1 Guide tube 2.5 m with fastening sleeve
- 1 Insulating tape 15 mm to attach the fibreglass cable to the flexible guide head
- 1 Sanding pad 50 x 50 mm
- 1 Special adhesive, 3 g

CIMCO-item no. 14 2060	15 m
CIMCO-item no. 14 2062	25 m
CIMCO-item no. 14 2064	35 m

In our **main catalogue starting on page 103** you will find more cable pull systems, such as the PowerDrive cable pull system, the Kabelmax® underfloor cable pull system or the Kabeljet® variable cable pull system!

Kati® Blitz Mini accessories

Replacement rod

- Wound into cassette
- 2 Rod ends with external thread M 2.5
- 1 Flexible guide head Mini

CIMCO-item no. 14 2066

Rod length 15 m

CIMCO-item no. 14 2068

Rod length 25 m

CIMCO-item no. 14 2070

Rod length 35 m

Flexible Guide Head Set, 5-piece

- With internal thread M 2.5

CIMCO-item no. 14 2074

Service set, 13-piece

- 10 Rod ends Mini
- 1 Insulating tape width 15 mm, length 10 m
- 1 Sanding pad 50 x 50 mm
- 1 Special adhesive 3 g

CIMCO-item no. 14 2072

Rod ends

- Made of brass
- With external thread M 2.5

CIMCO-item no. 14 2078

Guide tube 2.5 m

- Low-friction tube
- With fastener, mounted on tube

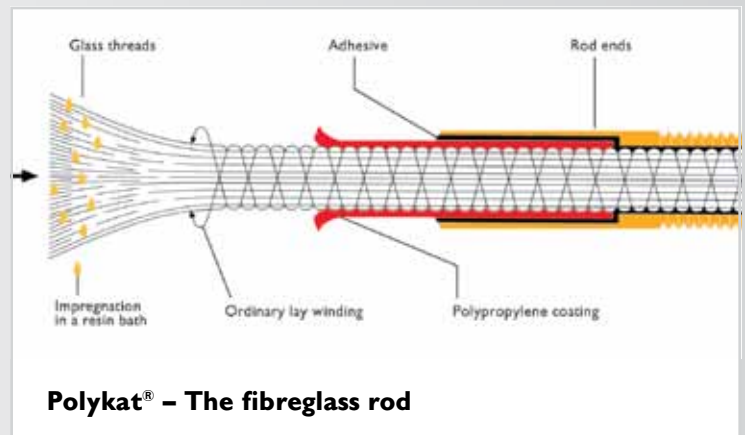

CIMCO-item no. 14 2076

EXPERT TIP

The combination of extreme bending strength and maximum thrust stability provides the Polykat® fibreglass rod with the characteristics of a flexible rod. As a result, extremely small bending radii are possible and tight pipe bends can be passed through easily. The smooth plastic coating has excellent sliding properties and reduces the friction resistance to a minimum. It is characterised by high wear resistance. The high elasticity of Polykat® fibreglass rods facilitates the construction of unrivalled small, compact and handy devices.
